The Original bag is the most common Edgewood bag used by benchrest shooters. Filled with heavy sand, it weighs between 10 and 14 lbs. depending on body height and has a footprint of about 6" x 8". We build it with reinforced leather sides and heavy nylon top and ears along with a multi-layered donut base which allows the bag to sit firmly on the bench and minimizes any rocking back and forth. EDGE model includes the following upgrades: Extra rigid, super flat bag base made with a unique material resists deformation over time ""Overlay Ears"" - Whether you choose slick material or cordura, a durable layer of leather is added underneath the material which contributes to consistency in shape and performance as well as extreme longevity and resistance to wear. Flatter ear space means the riding surface at the base of the ears has been redesigned to practically eliminate inconsistencies in the transition between the riding surface and the ear base. This remedies any potential drag or grabbing and increases longevity by removing an inherent wear point. Reinforced ear base isolates the ear set from the shape of the bag, contributing to consistency in the contact surface and ear spread. Embroidered cordura tops showcase our brand new logo and highlight the evolution of our designs.
