

AXON SWITCH - UNITY TACTICAL AXON SWITCH FOR SUREFIRE/CRANE LASER 7" BLACK

[Shooting Accessories](#) > [Flashlights & Accessories](#) > [Flashlight Accessories](#)

The pinnacle of remote switch design for weapon-mounted accessories, AXON™ provides complete control of lights and lasers in a single, compact and rugged housing. AXON™ is the direct result of operational feedback from professional end-users on our industry leading switch technology. Lights and lasers can be fired from individual buttons with versions available for popular issued devices. Standard AXON™ models feature each button firing devices independently. SYNC models fire the laser independently, while the light button will fire both light and laser simultaneously. NGAL variants operate in a SYNC capacity, but offer a visible override feature for light and laser. Standard configuration is 7" cable length. AXON™ mounts directly to M1913 Rail or M-LOK® (with optional M-LOK® Mounting Kit). Its unique design provides tactile differentiation between the two buttons to eliminate confusion in dark, cold and high-stress situations. The light (angled) button features a switch that allows for both momentary and constant activation, while the laser button features a momentary-only button that supports the laser's double-click-for-constant feature. SPECS MATERIAL - IMPACT RESISTANT POLYMER
COMPATIBILITY - SUREFIRE®, NATO CRANE-SPEC PORT, NGAL (LA-23/PEQ)

Introduction

Thank you for choosing the AXON SWITCH UNITY TACTICAL. This product is designed to provide you with reliable control of lights and lasers for weaponmounted accessories. To ensure your safety and enhance your experience with this product, please read and follow the guidelines outlined in this manual carefully.

General Safety Guidelines

- Ensure safe use of the AXON SWITCH by following all instructions provided in this guide.
- Be aware of potential risks associated with the use of weaponmounted accessories.
- Regularly check for any product recalls or safety notices through the EU Safety Gate platform.
- For online purchases, verify that the seller complies with EU safety requirements.
- If using this product around vulnerable groups, such as children, take extra precautions to ensure their safety.

Specific Safety Precautions for Use

- Always ensure that the weapon is unloaded before installing or handling the AXON SWITCH.
- Avoid using the AXON SWITCH in wet or damp conditions to prevent electrical hazards.
- Do not modify the AXON SWITCH or its components in any way.
- Keep the AXON SWITCH out of reach of children and unauthorized users.
- Do not point the laser at eyes or reflective surfaces to prevent injury.
- Use the AXON SWITCH only for its intended purpose as described in this guide.

Instructions for Installation and Usage

1. Installation

- Ensure the weapon is unloaded.
- Mount the AXON SWITCH directly to M1913 Rail or MLOK® using the optional MLOK® Mounting Kit.
- Ensure that the connection is secure and that the switch is easily accessible.

2. Usage

- Identify the buttons on the AXON SWITCH:
 - The angled button activates the light and can be set for momentary or constant activation.
 - The laser button is momentaryonly and supports a doubleclick feature for constant activation.
- When using the AXON SWITCH, ensure that you are familiar with the tactile differentiation between the buttons to avoid confusion in highstress situations.

3. Operational Tips

- Test the functionality of the AXON SWITCH before use to ensure all buttons are operational.
- Familiarize yourself with the activation methods in a safe environment before operational use.

Disposal Instructions

- Dispose of the AXON SWITCH in accordance with local regulations for electronic waste.
- Do not dispose of the AXON SWITCH in regular household waste.

- If the AXON SWITCH is damaged or no longer functional, follow local guidelines for recycling electronic devices.
