

MOE QUICK DETACH BIPOD FOR M-LOK - MAGPUL MOE QUICK DETACH BIPOD FOR M-LOK FLAT DARK EARTH

[Shooting Accessories](#) > [Bipods, Monopods & Accessories](#) > [Bipods](#)

MAGPUL MOE QUICK DETACH BIPOD FOR M-LOK Magpul offered a variety of bipods for quite some time, but none have attached as simply and quickly as the MOE QD Bipod for M-LOK. This new bipod provides shooters a quick-attach and detach function when using guns with an M-LOK hand guard or forend; by speeding up the attachment process via the integral attachment knob, you can get support when firing faster than ever before. To attach the bipod, simply insert the M-LOK stud into the M-LOK slot, rotate the bipod 45° counterclockwise so the stud is perpendicular to the M-LOK slot, and tighten the adjustment knob to securely fasten against the forend. No tools required. Aside from the quick, simple attachment method, the bipod is almost 40% lighter than some of their existing bipods. The injection-molded construction won't deform or break under pressure, and it provides a consistent, stable platform from which to shoot. The bipod plate – made from the same injection-molded material as the bipod itself – provides a solid mounting surface and features two (2) additional M-LOK lugs to promote proper alignment after installation, as well as increased stability and durability during recoil. The bipod is also equipped with a low-profile sling stud on the rear to allow sling attachment for easy carry and transportation of the firearm. The MOE QD bipod has a low stack height of 1.7" when folded, giving it a streamlined profile when the legs are stowed. When the legs are needed, they deploy and stow with the push of a button, snapping and locking into position. The legs extend from 7" to 10" and are adjusted easily and independently via a button located at the top of each leg. Within this adjustment range, there are seven (7) ½" spaced locking detents to fine tune the bipod's deployed height. Additionally, the bipod's soft, stepped, non-slip rubber feet grip a wide array of shooting surfaces; the feet are also easily removed with a roll-pin punch should shooters want to change them to something different (the bipod accepts most Atlas-pattern bipod feet). **FEATURES:** QUICK, SIMPLE INSTALLATION: The MOE QD Bipod installs via an adjustment knob Minimizes installation requirements since no other hardware is required **COMPACT,** **LIGHTWEIGHT:** 40% lighter than some other Magpul bipods Stack height of 1.7"; when extended legs measure 7"-10" in 0.5" increments **VERSATILE LEGS AND FEET:** Soft, stepped, non-slip rubber feet grip a wide array of shooting surfaces; the feet are also easily removed with a roll-pin punch Legs accept most Atlas-pattern bipod replaceable feet to best match the needs of your environment **SPECIFICATIONS:** Attachment: M-LOK Slots Materials: Polymer, steel Height, max: 10 in. Pan and Tilt: No Weight: 9 oz. Made in the USA.

MOE Quick Detach Bipod for MLOK Safety Instructions

Introduction

Thank you for choosing the MOE Quick Detach Bipod for MLOK. This product is designed to enhance your shooting experience by providing a stable support platform. To ensure safe and effective use, please read this safety instruction guide carefully.

General Safety Guidelines

- Always ensure that the bipod is securely attached before use to prevent accidental detachment.
- Inspect the bipod regularly for any signs of wear or damage. Do not use if any components are compromised.
- Keep the bipod and firearm out of reach of children and unauthorized users.
- Use the bipod only with firearms that are compatible with MLOK attachments.
- Follow all local laws and regulations regarding firearm usage and safety.

Specific Safety Precautions for Use

- **Avoid Overloading:** Do not exceed the weight limit of the bipod. Check the specifications for the maximum supported weight.
- **Proper Handling:** Always handle the bipod and firearm responsibly. Treat every firearm as if it is loaded.
- **Sling Attachment:** When using the lowprofile sling stud for sling attachment, ensure that the sling does not interfere with the bipod's functionality.
- **Shooting Surface:** Ensure that the bipod feet are securely gripping the shooting surface to prevent slipping or movement during use.
- **Environmental Awareness:** Be mindful of your shooting environment. Avoid using the bipod in areas with unstable or uneven ground.

Instructions for Installation and Usage

Installation

1. **Attach the Bipod:**
 - Insert the MLOK stud into the MLOK slot on your firearm.
 - Rotate the bipod 45° counterclockwise until the stud is perpendicular to the MLOK slot.
 - Tighten the adjustment knob to secure the bipod firmly against the forend. No tools are required.

Usage

1. **Deploying the Legs:**
 - Press the button located at the top of each leg to deploy the bipod legs.
 - The legs will snap and lock into position. Ensure they are secure before use.
2. **Adjusting the Height:**
 - Extend the legs from 7" to 10" by pressing the button on each leg.
 - Utilize the seven (7) ½" spaced locking detents to finetune the height as needed.
3. **Stowing the Legs:**
 - To stow the legs, press the button again and fold the legs back into the compact position.

Disposal Instructions

- Dispose of the bipod in accordance with local regulations for plastic and metal waste.
- If the bipod is damaged beyond repair, ensure it is disposed of safely to prevent any potential hazards.

Contact Information for Further Support

For any inquiries or safety concerns regarding the MOE Quick Detach Bipod for MLOK, please refer to the manufacturer's contact details provided with your product.

By following these safety instructions, you can ensure a safer and more enjoyable shooting experience with your MOE Quick Detach Bipod for MLOK. Thank you for your attention to these important guidelines.
