

# STANDARD BULLET SEATING MICROMETERS - #24 STANDARD BULLET SEATING MICROMETER

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

# Safety Instruction Guide for STANDARD BULLET SEATING MICROMETERS #24

## Introduction

Thank you for choosing the STANDARD BULLET SEATING MICROMETERS #24. This product is designed to enhance the precision of your bullet seating process. To ensure safe and effective use, please read this safety instruction guide carefully. It contains important information regarding product safety, usage precautions, and proper disposal.

## General Safety Guidelines

- Ensure that the product is used only for its intended purpose.
- Always wear appropriate safety gear, including eye protection, when using this product.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the product for any signs of damage or wear.
- Report any unsafe conditions or incidents to the appropriate authorities.
- Stay informed about product recalls by checking the EU's Safety Gate platform.

## Specific Safety Precautions for Use

- Do not exceed the recommended bullet seating depths to avoid potential safety hazards.
- Use the product in a wellventilated area to minimize exposure to any fumes or dust.
- Ensure that your work area is clean and free from clutter to prevent accidents.
- Handle the micrometer with care to avoid damaging the precision components.
- Follow all manufacturer instructions when converting your conventional seating die to a micrometer seating die.
- Avoid using the product if you are under the influence of drugs or alcohol.

## Instructions for Installation and Usage

### 1. Preparation

- Ensure that you have the correct seating die compatible with the micrometer.
- Gather all necessary tools and materials before starting the installation process.

### 2. Installation

- Remove the existing seat plug from your seating die by unscrewing it counterclockwise.
- Match the number on your current seating plug to the corresponding bullet seating micrometer number.
- Screw the micrometer seating die into the seating die using the 1/220 threads, turning it clockwise until secure.

### 3. Usage

- Adjust the micrometer to the desired bullet seating depth by turning the micrometer knob.
- Insert a bullet into the seating die and operate the press to seat the bullet.
- Check the seating depth using a caliper to ensure accuracy.
- Repeat the process as necessary for additional rounds.

### 4. PostUse Care

- Clean the micrometer and seating die after use to maintain precision.
- Store the product in a dry, safe location away from direct sunlight and moisture.

## Disposal Instructions

- Dispose of the product responsibly in accordance with local regulations.
- Do not dispose of the product in regular household waste.
- Check with local waste management facilities for guidance on proper disposal methods.

## **Contact Information for Further Support**

For further assistance or inquiries regarding safety, please consult the product packaging or visit the manufacturer's website for more information.

Thank you for your attention to these safety instructions. By following these guidelines, you help ensure a safe and effective experience with the STANDARD BULLET SEATING MICROMETERS #24.
