

STANDARD BULLET SEATING MICROMETERS - #15 STANDARD BULLET SEATING MICROMETER

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

Safety Instruction Guide for STANDARD BULLET SEATING MICROMETERS #15

Introduction

Thank you for purchasing the STANDARD BULLET SEATING MICROMETERS #15. This guide provides essential safety instructions and guidelines to ensure safe and effective use of this product. Please read this document carefully before using the micrometer to ensure proper handling and avoid potential hazards.

General Safety Guidelines

- Always ensure that the micrometer is used in accordance with the manufacturer's instructions.
- Keep the micrometer out of reach of children and vulnerable individuals.
- Use the micrometer only for its intended purpose as described in this guide.
- Regularly inspect the micrometer for any signs of damage or wear. Do not use if damaged.
- Store the micrometer in a safe, dry place when not in use to prevent damage and maintain accuracy.
- Report any unsafe product incidents or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Ensure that the micrometer is compatible with your seating die before installation.
- Always wear appropriate safety gear, such as safety glasses, when using the micrometer.
- Avoid applying excessive force when adjusting the micrometer to prevent damage.
- Keep hands and other body parts clear of moving parts during operation.
- Do not attempt to modify or disassemble the micrometer as this may compromise safety and accuracy.
- Use caution when handling bullets and reloading components to avoid accidental injury.

Instructions for Installation and Usage

1. Compatibility Check

- Verify that your seating die is compatible with the micrometer by checking the thread specifications. The micrometer is designed for dies that use a seat plug with 1/20 threads.

2. Installation

- Remove the existing seating plug from your die.
- Align the micrometer with the die and screw it in until it is securely attached.
- Ensure the micrometer is properly seated and locked in place.

3. Adjusting the Micrometer

- To adjust the bullet seating depth, rotate the micrometer's adjustment knob.
- Use the reference chart provided by Redding to match the micrometer number with the desired bullet seating depth.

4. Testing the Setup

- Before proceeding with reloading, test the setup by seating a bullet and measuring the depth.
- Make any necessary adjustments to achieve the desired seating depth.

5. Using the Micrometer

- Once set, use the micrometer to seat bullets consistently.
- Regularly check the seating depth to ensure accuracy.

Disposal Instructions

- Dispose of the micrometer and any associated materials in accordance with local regulations.
- Do not dispose of the product in household waste. Check for recycling options in your area.

Contact Information for Further Support

For any safety inquiries or additional support, please refer to the contact information provided by the manufacturer or authorized retailer.

Conclusion

By following these safety instructions, you can ensure the safe and effective use of the STANDARD BULLET SEATING MICROMETERS #15. Your safety is our priority, and we appreciate your commitment to following these guidelines. Thank you for choosing our product.
