

STANDARD BULLET SEATING MICROMETERS - #17 STANDARD BULLET SEATING MICROMETER

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

Safety Instruction Guide for STANDARD BULLET SEATING MICROMETERS

Introduction

Thank you for choosing the STANDARD BULLET SEATING MICROMETERS. This guide provides essential safety instructions, usage guidelines, and disposal instructions to ensure safe and effective use of this product. Please read this guide carefully before using the micrometer to avoid potential hazards.

General Safety Guidelines

- Ensure safe use of the STANDARD BULLET SEATING MICROMETER by following these guidelines:
 - Always handle the micrometer with care to avoid damage or injury.
 - Keep the micrometer away from children and vulnerable individuals.
 - Use the micrometer only for its intended purpose as described in this guide.
 - Inspect the micrometer for any signs of wear or damage before each use.
 - Store the micrometer in a safe, dry place when not in use.

Specific Safety Precautions for Use

- To minimize risks associated with the use of the STANDARD BULLET SEATING MICROMETER:
 - Always wear appropriate safety gear, such as safety glasses, when using the micrometer.
 - Ensure that your work area is clean and free of obstructions.
 - Do not exceed the maximum seating depth specified for your bullets.
 - Avoid using excessive force when adjusting the micrometer settings.
 - Do not attempt to modify or repair the micrometer yourself; seek professional assistance if needed.

Instructions for Installation and Usage

- Follow these steps to install and use the STANDARD BULLET SEATING MICROMETER safely:

Installation

1. Preparation:

- Ensure that your seating die is compatible with the micrometer. Confirm that it uses a seat plug with 1/20 threads.

2. Changing the Seating Plug:

- Remove the existing seating plug from your seating die by turning it counterclockwise.
- Align the micrometer seating plug with the threads of the die.
- Turn the micrometer seating plug clockwise to securely attach it to the die.

Usage

1. Setting the Micrometer:

- Adjust the micrometer to your desired bullet seating depth by turning the micrometer dial.
- Use the reference chart provided to match your current seating plug number with the corresponding micrometer number.

2. Seating Bullets:

- Place a cartridge case in the die and lower the ram to seat the bullet.
- Monitor the seating depth to ensure it remains within the specified limits.

3. PostUse Care:

- After use, clean the micrometer to remove any debris or residue.
- Store the micrometer in its protective case to prevent damage.

Disposal Instructions

- Dispose of the STANDARD BULLET SEATING MICROMETER responsibly:
 - Follow local regulations for the disposal of metal and plastic materials.
 - Do not dispose of the micrometer in regular household waste.
 - If the micrometer is damaged beyond repair, contact your local waste management facility for proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the STANDARD BULLET SEATING MICROMETER, please refer to the manufacturer's contact details provided on the product packaging or visit the official website.

By following these safety instructions, you can ensure a safe and effective experience with your STANDARD BULLET SEATING MICROMETERS. Thank you for your attention to these important guidelines.
