

E-Max Low Profile Electronic Hearing Protection

The Low-Profile E-Max® hearing protection combines great circuitry with a low profile earcup that's ideal for shotgun shooters and action shooters. The two microphones in the E-Max® amplify sounds below 85 decibels, which amplifies normal communication, range commands, and environmental sounds. Above 85 decibels, the microphones shut off for a split second to protect the shooter's hearing. Two microphones - one in each cup - give the user true stereo sound and allow the user to identify the directional source of a sound. Includes an integrated audio input jack allowing music to be played. Runs on 2 AAA batteries (not included). 23NRR

Caldwell EMax Low Profile Electronic Hearing Protection Safety Instructions

Introduction

Thank you for choosing the Caldwell EMax Low Profile Electronic Hearing Protection. This product is designed to provide effective hearing protection while allowing you to communicate and enjoy your environment safely. Please read this safety instruction guide carefully to ensure safe and proper use of the product.

General Safety Guidelines

- Always use the EMax hearing protection when shooting or in noisy environments to protect your hearing.
- Ensure that the product is suitable for your specific needs and that you understand how to operate it correctly.
- Regularly check the product for any signs of damage or wear. Do not use if damaged.
- Keep the product out of reach of children and vulnerable individuals who may misuse it.
- Familiarize yourself with the EU's Safety Gate platform for updates on product recalls.

Specific Safety Precautions for Use

- The EMax hearing protection is designed to amplify sounds below 85 decibels. Sounds above this level will trigger the microphones to shut off momentarily.
- Do not expose the hearing protection to extreme temperatures or moisture, as this may affect its performance.
- Avoid using the product in environments where there may be sudden loud noises exceeding 85 decibels without additional protection.
- Ensure that the ear cups fit snugly against your ears for optimal sound amplification and protection.
- Do not modify the product in any way, as this may compromise its safety features.

Instructions for Installation and Usage

1. Installing Batteries:

- Open the battery compartment located on the hearing protection device.
- Insert 2 AAA batteries (not included) ensuring the correct polarity is observed.
- Close the battery compartment securely.

2. Using the Hearing Protection:

- Place the ear cups over your ears, ensuring a comfortable fit.
- Adjust the headband to achieve a snug fit without discomfort.
- Turn on the device using the power switch. You should hear ambient sounds amplified.
- Test the functionality by speaking to someone nearby; you should be able to hear your voice clearly.

3. Connecting Audio Devices:

- Use the integrated audio input jack to connect your audio device.
- Ensure that the volume of the audio device is set to a safe level to avoid hearing damage.

4. After Use:

- Turn off the device to conserve battery life.

- Clean the ear cups with a soft cloth and store the product in a dry place.

Disposal Instructions

- Dispose of the product in accordance with local regulations regarding electronic waste.
- Remove batteries before disposal and recycle them according to local guidelines.
- Do not dispose of the product in regular household waste.

Contact Information for Further Support

For any inquiries regarding safety, product performance, or assistance, please refer to the manufacturer's contact details provided in the product packaging or on the official website.

Thank you for your attention to these safety instructions. Enjoy your Caldwell EMax Low Profile Electronic Hearing Protection responsibly and safely.
