## Safety Instructions

### Introduction

Thank you for choosing the Dillon XL750 Progressive Reloading Machine. This guide provides essential safety instructions to ensure safe and effective use of the reloading machine. It is important to read and understand these instructions before operating the machine.

### General Safety Guidelines

- Ensure the work area is clean and welllit before starting any reloading activities.
- Keep the reloading machine away from children and unauthorized users.
- Wear appropriate safety gear, including safety glasses and hearing protection, when operating the machine.
- Do not use the machine for any purpose other than reloading ammunition.
- Be aware of your surroundings and avoid distractions while using the reloading machine.
- Always follow the manufacturer's instructions and guidelines for safe operation.
- Report any accidents or unsafe conditions to the appropriate authorities.

### Specific Safety Precautions for Use

- Always check the machine for any signs of damage or wear before use. Do not operate if damaged.
- Ensure that all components are securely attached and properly aligned before starting the reloading process.
- Use only recommended die sets and components for reloading to avoid malfunctions.
- Do not exceed the maximum load limits specified for the machine.
- Keep fingers and other body parts away from moving parts during operation.
- Store all reloading materials, including powders and primers, in a safe and secure location away from heat and moisture.
- Follow proper procedures for handling and storing ammunition and reloading components to prevent accidents.

### Instructions for Installation and Usage

#### Installation

1. **Choose a Suitable Location:** Select a sturdy workbench or table that can support the weight of the Dillon XL750 machine.
2. **Assemble the Machine:** Follow the assembly instructions provided in the product manual. Ensure all parts are securely fastened.
3. **Install the Electric Case Feeder (Optional):** If using the electric case feeder, follow the specific instructions for installation.
4. **Set Up the Strong Mount (Optional):** If using the strong mount, ensure it is securely attached to the work surface.
5. **Position the Bullet Tray and Powdercheck Die:** Place these items in their designated positions for easy access during reloading.

#### Usage

1. **Prepare the Work Area:** Ensure that your work area is free from clutter and distractions.
2. **Load Components:** Carefully load the appropriate components into the machine as per the manufacturer's guidelines.
3. **Adjust Settings:** Make any necessary adjustments to the machine settings based on the caliber being

loaded.

4. **Start Reloading:** Begin the reloading process, monitoring the machine for any unusual sounds or movements.
5. **Inspect Completed Rounds:** After reloading, inspect the completed rounds for quality and consistency.
6. **Clean the Machine:** After use, clean the machine according to the maintenance instructions in the product manual.

## Disposal Instructions

- Dispose of any unused or expired reloading components in accordance with local regulations.
- Recycle packaging materials where possible.
- Do not dispose of harmful substances such as powders or primers in regular trash. Follow local hazardous waste disposal guidelines.

## Contact Information for Further Support

For further support, please refer to the manufacturer's website or contact their customer service directly. Ensure that you have the product model and any relevant information ready for assistance.

By following these safety instructions, you can ensure a safe and effective reloading experience with your Dillon XL750 Progressive Reloading Machine. Always prioritize safety and remain informed about best practices in reloading.
