Dillon XL750 Progressive Reloading Machine

Safety Instructions

Introduction

Thank you for choosing the Dillon XL750 Progressive Reloading Machine for Rifle Calibers. This guide provides essential safety instructions to ensure the safe and effective use of your reloading machine. Please read this document carefully before using the product.

General Safety Guidelines

- Ensure safe use of the Dillon XL750 by following all instructions in this guide.
- Always handle all reloading components, including primers, powder, and bullets, with care.
- Keep the machine and work area clean and organized to prevent accidents.
- Do not use the reloading machine if you are tired, under the influence of substances, or distracted.
- Always wear appropriate personal protective equipment, such as safety glasses and hearing protection.
- Ensure that children and other vulnerable individuals are kept away from the reloading area.
- Report any unsafe products or accidents to the appropriate authorities.
- Stay informed about product recalls and safety updates through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Before operating the Dillon XL750, read the user manual thoroughly.
- Ensure that the machine is securely mounted to a stable workbench to prevent tipping or movement during operation.
- Do not attempt to modify or alter the machine in any way.
- Always use the correct die set for the specific caliber you are reloading.
- Be cautious of hot surfaces and moving parts when the machine is in operation.
- Avoid overloading the machine with materials beyond its intended capacity.
- If you notice any unusual noises or malfunctions, stop using the machine immediately and inspect it for issues.
- Keep all reloading materials stored in a cool, dry place away from direct sunlight and moisture.

Instructions for Installation and Usage

1. Installation:

- Place the Dillon XL750 on a sturdy workbench that can support its weight and operation.
- Use the provided mounting hardware to secure the machine firmly to the workbench.
- If using the optional electric case feeder, follow the specific installation instructions provided with that accessory.

2. Setup:

- Ensure that all components are in good condition and free of defects before use.
- Set up the die set according to the caliber you are reloading, following the user manual instructions.
- Adjust the machine settings, including the powder measure, to the specifications for your chosen caliber.

3. Operation:

- Before starting, doublecheck that there are no obstructions in the machine.

- Begin reloading by following the stepbystep instructions outlined in the user manual.
- Monitor the reloading process closely to ensure that everything is functioning correctly.
- If any issues arise during operation, cease use immediately and troubleshoot as needed.

4. PostUse:

- After completing your reloading session, clean the machine and remove any residual materials.
- Store all reloading components safely and securely.
- Regularly inspect the machine for wear and tear, and perform maintenance as recommended in the user manual.

Disposal Instructions

- Dispose of any unused or expired reloading materials in accordance with local regulations.
- Do not dispose of hazardous materials in regular trash. Contact your local waste management authority for proper disposal methods.
- Ensure that the reloading machine is unplugged and disassembled before disposal.

Contact Information for Further Support

For any questions or concerns regarding the Dillon XL750 Progressive Reloading Machine, please refer to the manufacturer's contact information provided in the user manual. It is essential to have a designated EU contact point for safety inquiries.

By adhering to these safety instructions, you can ensure a safe and efficient reloading experience with the Dillon XL750 Progressive Reloading Machine. Always prioritize safety and compliance with the guidelines provided.
