Dillon XL750 Progressive Reloading Machine

Safety Instruction Guide

Introduction

Thank you for choosing the Dillon XL750 Progressive Reloading Machine for Pistol Calibers. This guide provides essential safety instructions and guidelines to ensure safe and effective use of the reloading machine. Please read this manual carefully before operating the machine.

General Safety Guidelines

- Ensure that the reloading machine is used in a wellventilated area to avoid inhalation of any dust or particles.
- Always wear appropriate personal protective equipment (PPE), including safety goggles and gloves, to protect against potential hazards.
- Keep the reloading area clean and free of clutter to prevent accidents.
- Store all components, including powders and primers, in a safe and secure location away from children and pets.
- Familiarize yourself with the machine's components and their functions before use.
- Never leave the machine unattended while in operation.
- Report any unsafe products or accidents to the relevant authorities and check for recall updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Electrical Safety:** Ensure that the machine is connected to a properly grounded outlet. Do not use extension cords that are not rated for the machine's power requirements.
- **Handling of Components:** Use caution when handling powders, primers, and other reloading components. Follow the manufacturer's instructions for storage and handling.
- **Avoid Overloading:** Do not exceed the recommended capacity of the machine. Overloading can lead to malfunctions and potential hazards.
- **Age Restrictions:** This machine is intended for use by individuals aged 18 and older. Keep it out of reach of children.
- **Emergency Procedures:** In case of an emergency, know how to quickly disconnect the power supply and access first aid supplies.

Instructions for Installation and Usage

Installation

1. **Location:** Place the Dillon XL750 on a sturdy workbench that can support the weight of the machine and the materials used.
2. **Height Adjustment:** The machine height from the bench is 32" without the optional electric case feeder and 38 1/2" with the electric case feeder installed. Adjust accordingly for comfortable use.
3. **Secure Mounting:** If using the Strong Mount, ensure it is securely fastened to the workbench.
4. **Die Set:** Order and install the appropriate die set separately as per your reloading needs.

Usage

1. **Preparation:** Gather all necessary materials, including brass, bullets, powder, and primers.
2. **Loading Procedure:**
 - Follow the specific instructions provided with your die set for loading cartridges.
 - Ensure that the machine is set to the correct caliber (e.g., 380 Auto) before starting.
3. **Operation:**

- Operate the machine according to the user manual. Do not force any components.
 - Monitor the reloading process closely to detect any irregularities.
4. **Maintenance:** Regularly check and clean the machine as per the manufacturer's maintenance guidelines to ensure optimal performance.

Disposal Instructions

- Dispose of any unused or expired reloading components, such as powders and primers, in accordance with local regulations.
- Follow environmentally responsible practices for disposing of metal and plastic parts of the machine.
- Contact your local waste disposal authority for guidance on hazardous materials disposal.

Contact Information for Further Support

For further assistance or inquiries regarding the Dillon XL750 Progressive Reloading Machine, please refer to the manufacturer's website or customer service resources.
