Dillon SL900 Progressive Reloading Machine for Shotshells Safety Instructions

Introduction

Thank you for choosing the Dillon SL900 Progressive Reloading Machine for Shotshells. This manual provides essential safety instructions and guidelines to ensure safe and effective use of your reloading machine. Please read this document carefully before operating the machine.

General Safety Guidelines

- Ensure that the reloading machine is used only for its intended purpose, which is to reload 12gauge shotshells.
- Always operate the machine in a wellventilated area to avoid inhalation of powder or other particles.
- Keep the workspace clean and free from obstructions to prevent accidents.
- Use personal protective equipment (PPE) such as safety glasses and gloves while operating the machine.
- Store all components, including powder and primers, in a secure and dry location away from children and pets.
- Regularly inspect the machine for any signs of wear or damage. Do not use the machine if it is not functioning correctly.

Specific Safety Precautions for Use

- Only use components that are compatible with the Dillon SL900 to avoid malfunctions or accidents.
- Avoid overloading the machine; adhere to the manufacturer's loading recommendations.
- Do not leave the machine unattended while in operation.
- Be cautious of moving parts and keep hands and clothing clear of the machine's mechanisms.
- If a malfunction occurs, immediately stop using the machine and refer to the troubleshooting section of the manual.
- Ensure that the electric case feeder (if used) is properly installed and functioning to prevent misfeeds and jams.

Instructions for Installation and Usage

1. Installation

- Choose a stable, level surface for the machine to ensure proper operation.
- Assemble the machine according to the manufacturer's instructions, ensuring all components are securely attached.
- If using the electric case feeder, follow the specific assembly instructions provided with the feeder.

2. Usage

- Before starting, ensure that all materials required for reloading (hulls, powder, primers, wads) are ready and within reach.
- Set up the machine according to the load specifications for 12gauge shotshells.
- Turn on the machine and allow it to cycle through a few rounds to ensure proper operation.
- Begin reloading by following the stepbystep process outlined in the user manual.
- Monitor the operation closely, looking for any irregularities or malfunctions.

Disposal Instructions

- Dispose of any unused or expired components (such as powder and primers) in accordance with local regulations.
- Ensure that all materials are disposed of safely to prevent environmental contamination.
- Recycle or dispose of the machine and its components in accordance with local electronic waste disposal guidelines.

Contact Information for Further Support

For any safety inquiries, product support, or to report unsafe products, please reach out to the designated EU contact point for assistance.

Conclusion

By following these safety instructions and guidelines, you can ensure a safe and effective reloading experience with your Dillon SL900 Progressive Reloading Machine for Shotshells. Always prioritize safety and remain informed about the proper use and maintenance of your equipment. Thank you for your attention to these important safety measures.
